DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1, 2 and 4, drawn to an agent containing RGD-CAP and a method of using RGD-CAP to suppress mineralization and adhesion in the periodontal ligament, classified in class 514, subclass 2.
- II. Claim 3, drawn to a method of suppressing mineralization and adhesion in the periodontal ligament by over expressing RGD-CAP in the periodontal ligament cells, classified in class 514, subclass 44.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, and II are patentably distinct inventions for the following reasons. In the instant case the different invention of group I is to an agent containing RGD-CAP and a method of using RGD-CAP, while group II is to drawn to a method of suppressing mineralization and adhesion in the periodontal ligament by over expressing RGD-CAP. The agent of group I is not required for the method of group II. Further the agent of group I contains the protein RGD-CAP, while the method of group II merely over express RGD-CAP. The over expression of Group II could be accomplished by treatment of the periodontal cells with any compound capable of inducing RGD-CAP expression. Neither invention requires the other.

Furthermore, searching the inventions of groups I and II together would impose a serious search burden. In the instant case, the search of an agent containing RGD-CAP and a method of

using RGD-CAP, and a method of suppressing mineralization and adhesion in the periodontal ligament by over expressing RGD-CAP are not coextensive. The inventions of Groups I and II have a separate status in the art as shown by their different sub-classifications. As such, it would be burdensome to search the inventions of Groups I and II together.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, and because each requires a separate search of the prior art, restriction for examination purposes as indicated is proper.
